

A thousand years doesn't compare to one day of oppression. A day of oppression is incomparable. To be held against thy will with people that are insane is a sickness within itself. To be faced with all kinds of conditions on a daily basis is a harsh reality that you can't imagine. Most brothers have become oppressed so long that they have forgotten that they were oppressed. They are numb to the enemy and fight their friends. They will do all that they can in their power to maintain the status quo. You're either on the side of justice or not.

We are under Stockholm syndrome. We will defend any of our enemies for anything they have did. This government hasn't apologized for the enslavement of our people. Then if they apologize, where's our reparations!

Slave teaching must be outlawed among our people. Telling our people to turn the other cheek while the enemy hits us on both cheeks is madness! Your cowardice cannot lead our people, lack of fear is the first step. This government commits homicide to its citizens and should be on trial for the world to see.

We have money to aid Ukraine but none for the poor man, women, and children here in America. This government makes a mockery of us day and night and we are quick to forgive. This government doesn't tell the Jews to forgive Hitler or his methods. They still hold trial for anyone that aided Hitler & his regime, as they should.

All we ask is for our own land. Somewhere to raise our people. Without evil men & women telling us what we should do!
